

STATE OF ILLINOIS
REQUEST FOR PROPOSAL
ILLINOIS FINANCE AUTHORITY
DEBT MANAGEMENT APPLICATION SOFTWARE

Agency Reference #15-0011

IPB Reference # 22034654

The Illinois Finance Authority (“the Authority” or “IFA”) requests proposals from responsible Offerors to procure a real time Debt Management application (the “Solution”) that will enable the Authority to standardize its data entry, accounting, reporting and compliance practices in one consolidated system.

Since creation in January 2004, the Illinois Finance Authority (IFA) has provided access to low-cost capital to public and private institutions that are aligned with our mission of fostering economic development, creating and retaining jobs, and improving quality of life for Illinois residents. To date, IFA conduit financing programs have spanned every county and helped capitalize thousands of projects, assisting farmers and agri-businesses, business and industry, school districts and higher education institutions, healthcare facilities, cultural and social entities, and local governments develop, upgrade, expand, and sustain their operations and services. IFA is a body politic and corporate of the State of Illinois (“the State”) created through the consolidation and elimination of seven authorities and entities. The IFA is authorized by the Illinois Finance Authority Act to issue tax-exempt and taxable bonds and to make and guarantee non-conventional loans. The IFA does not receive appropriated funding from the State and operates at no cost to taxpayers.

A brief description is set forth below for the Offeror’s convenience, with detailed requirements in subsequent sections of this solicitation. If interested and able to meet these requirements, the Authority appreciates and welcomes an offer.

Brief Description:

This RFP is to invite proposals for a consolidated system that will assist IFA in streamlining its Debt Management process and functions, along with increasing internal controls, monitoring and compliance requirements. The Authority’s intent is to award a contract on the basis of the responses to this RFP, but is not obligated to. A comprehensive System will serve the business needs of IFA’s Departments of Finance, Legal and Compliance. A suitable System for IFA’s needs would have the capability to support multiple concurrent users, in addition to integrating with the Microsoft Dynamics/Great Plains general ledger package, the DocuWare records management system and provide real time updates and calculations.

Currently, the individual functions of the Authority utilize disparate technology systems resulting in employees performing repetitive entries and processes, reconciling multiple systems, and having to assemble cross-departmental data from these systems. Implementation of a single Debt Management solution is intended to ensure transparency and compliance with regulations, increase efficiency and effectiveness by adopting simplified and standardized business processes, optimize costs and risk resulting from maintenance of multiple systems, and empower leadership with critical insights to improve the management of IFA initiatives.

The resulting contract with the awarded vendor shall have an initial term of three years. In no event will the total term of the contract, including the initial term, any renewal terms, and any extensions exceed 10 years. Subject to the maximum total term limitation, IFA has the option to renew for the following terms: two, one year terms. This request for proposal (RFP) solicitation also seeks services for implementation of the proposed software package.

In compliance with the State and Federal Constitutions, the Illinois Human Rights Act, the U.S. Civil Rights Act, and Section 504 of the Federal Rehabilitation Act, the State of Illinois does not discriminate in employment, contracts, or any other activity.

The State of Illinois encourages prospective vendors to consider hiring qualified veterans and Illinois residents discharged from any Illinois adult correctional center, in appropriate circumstances.

Please read the entire solicitation package and submit an offer in accordance with the instructions. All forms and signature areas contained in the solicitation package must be completed in full and submitted along with the technical response and price proposal which combined will constitute the offer. Do not submit the instruction pages with offers. Offerors should keep the instructions and a copy of offers for future reference.

Forms A, Forms B, BEP Utilization Plan, and VSB Utilization Plan may be downloaded from the Illinois Procurement Bulletin (IPB) or from links provided in this document. These sections are a material part of this solicitation, and must be returned when applicable with a vendor's Offer.

Please adhere to Form and Content of Proposal requirements or offers may not be considered.

This competitive process may require that Offeror provide additional information and otherwise cooperate with the State. If an Offeror does not comply with requests for information and cooperate, the State may reject the Offer as non-responsive to the solicitation. Submitting an Offer does not entitle Offeror to an award or a contract. Posting Offeror's name in a Bulletin notice does not entitle Offeror to a contract. The State is not responsible for and will not pay any costs associated with the preparation and submission of any Offer. Offerors who fail to meet minimum requirements or who receive fewer than the minimum required points, if any, will not be considered for Price evaluation and award.

The State evaluates three categories of information: Responsibility, Responsiveness, and Price. - A.21.1.6. When the specification calls for “Brand Name or Equal,” the brand name product is acceptable. Other products will be considered with proof the other product meets

stated specifications and is equivalent to the brand product in terms of quality, performance and desired characteristics.

A.21.1.7. The State will determine whether the Offer complied with the instructions for submitting offers. Except for late submissions, and other requirements that by law must be part of the submission, the State may require that an Offeror correct deficiencies as a condition of further evaluation.

A.21.2. **RESPONSIBILITY:** A responsible Offeror is one who has the capability in all respects to perform fully the contract requirements and who has the integrity and reliability that will assure good faith performance. The State determines whether the Offeror is a “Responsible” Offeror; an Offeror with whom the State can or should do business. For example, the State may consider the following:

A.21.2.1. A “prohibited bidder” includes any person assisting an employee of the State of Illinois by reviewing, drafting, directing, or preparing any invitation for bids, a request for proposal, or request of information, or providing similar assistance unless such assistance was part of a publically issued opportunity to review drafts of all or part of these documents. For purposes of this section, an employee of the State of Illinois means one who, by the nature of his or her duties, has the authority to participate personally and substantially in the decision to award a State contract. No person or business shall submit specifications to a State agency unless requested to do so by an employee of the State. No person or business that contracts with a State agency to write specifications for a particular procurement need shall submit a bid or proposal or receive a contract for that procurement need.

Nothing herein is intended to prohibit a vendor from bidding or offering to supply developing technology, goods or services after providing the State with a demonstration of the developing technology, goods, or services; provided the subject of the demonstration to the State represents industry trends and innovation and is not specifically designed to meet the State's needs. Nor is it intended to prohibit a person or business from submitting a bid or offer or entering into a contract if the person or business: (i) initiates a communication with an employee to provide general information about products, services, or industry best practices and, if applicable, that communication is documented in accordance with Section 50-39 or (ii) responds to a communication initiated by an employee of the State for the purposes of providing information to evaluate new products, trends, services, or technologies.

A.21.2.2. Other factors that the State may evaluate to determine Responsibility include, but are not limited to: political contributions, certifications, conflict of interest, financial disclosures, taxpayer identification number, past performance in business or industry, references (including those found outside the Offer,) compliance with applicable laws, financial responsibility, insurability, effective equal opportunity compliance, payment of prevailing wages if required by law, capacity to produce or sources of supply, and the ability to provide required maintenance service or other matters relating to the Offeror’s ability to deliver in the quality and quantity within the time and price as specified in this solicitation.

A.21.2.3. Awarded Offerors must at all times have financial resources sufficient, in the opinion of the State, to ensure performance of the contract and must provide proof upon request. The State may require a performance bond if, in the opinion of the

State, it ensures performance of the contract. The State may terminate the Contract, consistent with the termination for cause provision of the Contract, if the vendor lacks the financial resources to perform under the Contract.

A.21.2.4. The State may require that an Offeror correct any deficiencies as a condition of further evaluation.

A.21.3. **PRICE:** The State identifies the lowest priced Offer that meets, Responsibility and Responsiveness requirements.

A.22. MINORITIES, FEMALES, AND PERSONS WITH DISABILITIES PARTICIPATION AND UTILIZATION PLAN: This solicitation may contain a goal to include businesses owned and controlled by minorities, females, and persons with disabilities in the State’s procurement and contracting processes. If the solicitation contains a goal, then failure to submit a Utilization Plan as instructed later in this solicitation may render the Offer non-responsive. Offerors who receive fewer than the minimum required points if any, will not be considered for Price evaluation and award.
- B.3.** If the State does not consider the Price to be fair and reasonable and negotiations fail to meet an acceptable Price, the State reserves the right to cancel the award and take appropriate action to meet the needs of the State. The State determines whether the price is fair and reasonable by considering the Offer, including the Offeror's qualifications, the Offeror's reputation, all prices submitted, other known prices, the project budget and other relevant factors.
- B.4.** The chart below shows the elements of Responsiveness that the State evaluates, their relative weights in point format and any minimum point requirements if any.

B.4.1. The total number of points for Responsiveness is 900.

B.4.2. RESPONSIVENESS ELEMENTS

The Offeror’s proposed solution must meet the “mandatory” minimum qualifications as outlined below.. If all of the mandatory minimum qualifications are not met, the Offeror’s entire proposal will be deemed “non-responsive”. Offeror should acknowledge that the solution meets each qualification by checking “Met” and returning this page as Part of Packet 1. If all responding Offerors fail to meet a particular mandatory, that mandatory may, at the sole discretion of the State , be removed so that the evaluation process may continue.

STATE OF ILLINOIS
SPECIFICATIONS/QUALIFICATIONS/STATEMENT OF WORK

D. SPECIFICATIONS/QUALIFICATIONS/STATEMENT OF WORK

D.1. GOAL: The comprehensive Debt Management software package IFA requires will provide real-time access to all bond, note, loan and other debt information from all past and present debt issuances including: debt service schedules (broken down to the CUSIP level and specific fund), call structures and redemptions, and other related information such as financing participants, ratings history, etc. The ability to support multiple concurrent users and stakeholders across the organization is required along with automatic generation of debt service schedules, interest accruals, amortization of premiums, discounts, and costs of issuance, CAFR reporting and creation of debt related journal entries.

Limitations To The Current System

The Authority does not have a single system for administrative functions such as accounting and reporting for its bond issuances and loan servicing. Individual departments utilize disparate systems and applications, performing functions that are typically included in a comprehensive Solution.

The Authority's current systems include various Microsoft products such as Excel and Access and software utilized by external parties in regards to loan servicing.

In the current environment, two SQL databases-Bond Issuances have an Access front-end while Loans Outstanding uses a browser (IE) front-end. Databases hold all current conduit bond issuances as well as issuances made on behalf of various prior predecessor agencies of the IFA and government loans. Excel spreadsheets hold other pertinent bond data from predecessor agencies of IFA and the loan servicer manages the software used to service specific programmatic loans issued on behalf of the Authority. Expenses, interest, other revenues and all other general ledger transactions take place within Microsoft Dynamics/Great Plains and the reconciliation of balances is a manual process.

In the current environment (Estimates):

IFA	Number of employees	25
	Number of departments	5
	Number of core users	15
	Number of casual users	10
	Number of simultaneous users	25
	Number of cost centers	500
	Daily /Annual business transactions	200 / 50000
Operating Environment	Security /Compliance requirements	Extensive State & Federal requirements
	Server /Workstation environment	Virtual Windows 2008 Servers, Windows 7 Workstations, 3 Employee Sites
	Database management systems	Microsoft Dynamics/SQL, Access databases
	Archive /Record management requirements	Extensive State & Federal requirements

D.2. SUPPLIES AND/OR SERVICES REQUIRED: Currently, the individual functions of the Authority utilize disparate technology systems resulting in employees performing repetitive entries and processes, reconciling multiple systems, and having to assemble cross-departmental data from these systems. Implementation of a single, Debt Management solution, is intended to ensure transparency and compliance with regulations, increase efficiency and effectiveness by adopting simplified and standardized business processes, optimize costs and risk resulting from maintenance of multiple systems, and empower leadership with critical insights to improve the management of IFA initiatives. The Debt Management Solution shall replace existing system functionality as well as add system functionality where none existed previously.

The Solution Should Include, But Not Be Limited To, The Following Functional Components:

- Financial Accounting and Reporting (FAR) functions (bond principal and interest payments and adjustments; loan principal and interest payments and adjustments; pro forma financial calculations; current and projected balances; all required financial reporting schedules, integrating with popular current General Ledger packages and records management systems, Accounts Receivables functionality and debt collection capability, etc. and supporting financial analytics).
- Debt and Compliance (DAC) functions (data entry and/or upload capability of new debt issuances and prior data on existing data to complete profiles; electronic checklists of required initial documentation and post issuance compliance monitoring; workflow and notification capability; invoicing of loan payments; annual statements, etc.).
- Document and Records Management (DARM) functions (integrating with the Authority's document and records management system; data entry and/or upload capability of new debt issuances and prior data on existing issuances to complete profiles; electronic checklists of required initial documentation and post issuance compliance monitoring; workflow and notification capability; invoicing of loan payments; annual statements, etc.).

The Debt Management Solution Should Include, But Not Be Limited To, The Following Non-Functional Capabilities:

- Solution Architecture (NFR-A) components (e.g., Integration Architecture, Workflow Processing, Data Warehousing and Business Intelligence, Data Management, User Interface, Data Entry Support and Online Help, System Administration).
- Technology Architecture (NFR-B) features (e.g., Scalability, Security, Data Storage and Archival, Audit, Capacity and Performance, Business Continuity and Disaster Recovery, Hosting, Remote Services, Cloud Computing, Infrastructure Platform, and Network).

The expected architecture of the Illinois Finance Authority's Debt Management Solution is illustrated in the figure below:

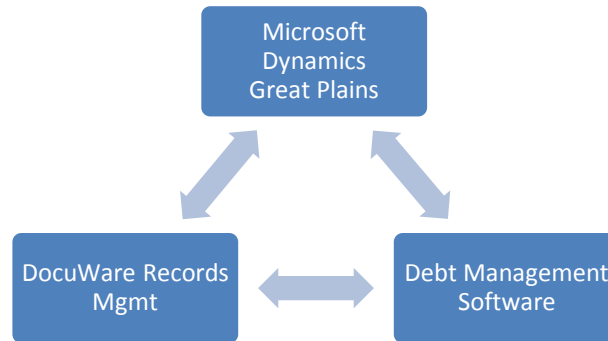

FIGURE D.1 – PROPOSED MAKE-UP OF IFA’S DEBT MANAGEMENT SOLUTION

The Envisioned Illinois Finance Authority’s Debt Management Solution Landscape Consists of:

- All-Inclusive Debt and Compliance transactional backbone: An end-to-end Debt Management Solution Package that is the transactional backbone for all debt and compliance administrative functions, including, but not limited to, financial accounting and reporting, compliance, debt monitoring and reporting, and loan management and reporting. The package could potentially be supplemented by a minimal number of point solutions, where necessary, should the Debt Management backbone fail to provide the required functionality for specific and critical functional components (*e.g.*, integrating with the current IFA ERP system and records management solution).
- Fully-integrated functional modules in the Debt Management Software Package: The Debt Management Software Package must be fully integrated across all modules. In other words, the Debt Management Software Package must be built on a unified code base across major functional domains, such as Financial, Debt and Compliance and Document and Records Management. It must be fully-integrated to deliver seamless data integration across software modules, as well as to facilitate automated, non-disruptive technical and functional upgrades at the Authority’s discretion in the future.
- System of record: The Debt Management Solution must serve as the system of record for all debt and compliance-related data and transactions. (*e.g.*, journal entries, debt service and loan payment schedules and balances, compliance reporting and monitoring, etc.).
- Out-of-the-box integrated analytics: The Debt Management Software Package must include pre-built analytical applications that are capable of fully integrating with the IFA’s ERP and document/records management systems. Dashboarding, key performance indicators, canned reports (including those included in the Comprehensive Annual Financial Report(CAFR)) and tools for ad-hoc analysis, data-mining, as well as bi-directional integration with MS Office tools such as MS Excel are required.

- Integration framework: A robust integration framework is required to be at the core of the Debt Management Software Package that encompasses capabilities and tools for data integration (e.g., ETL, web services, data quality, data profiling, replication, and change data capture), process integration, and information integration (e.g., content management, imaging, enterprise search and web 2.0) to enable seamless information exchange between the Debt Management backbone and other applications, such as the Statewide ERP solution.
- Information security: Security and controls across the data application and infrastructure tiers are critical features of the envisioned Debt Management Solution. Since the Debt Management Solution will contain highly sensitive and confidential data, robust information security, data protection and governance are required, including encryption, firewalls, identity and access management, role-based access control, privileged user access control (i.e., to prevent system and application administrators from unauthorized access to confidential information), digital rights management, etc., at all tiers of the Debt Management Solution (i.e., from user interface to disk). Additionally, security provisions must protect the Debt Management Solution from malicious code, unauthorized access, hackers, and intrusion. Security provisions of the Debt Management Solution must be in compliance with state security regulations, including but not limited to PIPA (Personal Information Protection Act, 815 ILCS 530/).

Functional Scope and Requirements

- The scope of the Debt Management Solution encompasses three (3) functional domains: Financial Accounting and Reporting, Debt and Compliance and Document and Records Management. The following illustration depicts the functional modules that fall within the scope of each of these three (3) functional domains. The Debt Management Solution will link both the IFA’s ERP and the records management and provide for real-time two way integrating with all modules.

IFA DATA SOURCE	CRITERIA			
Financial Accounting and Reporting	General Ledger	Accounts Payable	Accounts Receivable	Procurement
Debt and Compliance	Outstanding Bonds	Notes	Loans	Investments
Document and Records Management	All Illinois Finance Authority Records			

FIGURE D.2 - FUNCTIONAL SCOPE OF THE ILLINOIS FINANCE AUTHORITY’S DEBT MANAGEMENT SOLUTION

The functional requirement spreadsheets (Appendix I.2) list the desired functionality for each of the specified criteria.

To illustrate that the proposed Debt Management Software Package meets the functional requirements of the Authority, the Offeror must provide a response in Appendix I.2.

Non-Functional requirements

In addition to the functional requirements, the Authority is envisioning that the Debt Management Solution will meet specific non-functional requirements (Appendices I.3 and I.4) identified as central to the Debt Management Solution’s ability to meet the Authority’s needs. The non-functional requirements “A” and “B”, include usability, innovation, Offeror commitment, and technical requirements. Technical requirements include Solution Architecture (e.g., data warehousing, workflow processing) and Technology Architecture (e.g., hosting, data storage, scalability). To show that the proposed Debt Management Software Package meets the non-functional requirements of the Authority, the Offeror must provide a response in the above appendices.

Hosting

The State of Illinois requires that agencies, in making new information technology investments, evaluate and, if feasible, adopt appropriate cloud computing solutions.

Note: “Cloud Computing” is defined as having the same meaning as provided in the National Institute of Science and Technology (NIST) special publication 800-145: Cloud computing is a model for enabling ubiquitous, convenient, on-demand network access to a shared pool of configurable computing resources (*e.g.*, networks, servers, storage, applications, and services) that can be rapidly provisioned and released with minimal management effort or service provider interaction. This cloud model is composed of five essential characteristics (*i.e.*, on-demand self-service, broad network access, resource pooling, rapid elasticity, and measured service), three service models (*i.e.*, Software as a Service, Platform as a Service, and Infrastructure as a Service) and four deployment models (*i.e.*, private cloud, community cloud, public cloud, and hybrid cloud).

The Authority will explore options to host the Debt Management Software Package in either a third-party-hosted facility with basic systems administration support, or a third-party-hosted facility inclusive of the full range of managed services.

The Authority will review the Offeror’s Debt Management Software Package’s capability to accommodate each of the hosting options. The procurement of hosting and associated services is included in this solicitation and is listed in the non-functional requirements “B” portion of this RFP (Appendix I.4).

This RFP’s scope includes two hosting models such which the Authority will have the option, as its sole discretion through the contract resulting from this RFP, to change the delivery model of the Debt Management Software Package from an installed-base delivery model to a hosted, as-a-service, or other delivery model.

The two hosting options are:

- **Third-party-hosted (Offeror or other third-party):** The Offeror or a certified third-party partner on behalf of the Offeror will host the Debt Management Software Package in primary and secondary data centers. The Offeror will own the hardware and supporting infrastructure (network, storage, RDBMS servers, and application servers) and provide basic system administration support. In turn, the Authority will own the Debt Management Software Package licenses, be responsible for application administration, help desk and other support services, and rely on the Offeror or certified third-party to provide basic infrastructure administration services. Offerors are encouraged to provide details on either an Offeror hosted, or a certified partner hosted solution, as options for the Authority to consider.
- **Third-party-hosted (Offeror or other third-party) with managed services:** The Offeror or a certified third-party partner on behalf of the Offeror will host the Debt Management Software Package in primary and secondary data centers. The Offeror will own the hardware and supporting infrastructure (network, storage, RDBMS servers, application servers) while the Authority will own the Debt Management Software Package licenses. Additionally, the Offeror will be responsible for providing managed services for the Debt Management Solution (*e.g.*, Help Desk, Application Administration such as, but not limited to user account, role and profile management, application performance tuning, configuration management, etc.). Offerors are encouraged to provide details on an Offeror-hosted or certified partner-hosted solution that includes Offeror provided managed services as an option for the Authority to consider.

Migration of hosting to a cloud or a SaaS version of the Debt Management Software Package is within the scope of this Solicitation.

Working In Partnership With The Other IFA Vendors And System Integrators

The Debt Management Software Package Offeror will be required to work in partnership with the IFA Information Technology and Finance staff and DocuWare and Microsoft Dynamics vendors throughout the implementation process of the Debt Management Solution. In addition, it is requested that Offerors incorporate an optional pricing schedule and mechanism by which any other agency of the executive branch of the government of the State of Illinois may acquire one (1) or more licenses for the software solution proposed in response to this solicitation, at the agency's election, with the approval of the State Chief Information Officer. Offerors should also include an optional pricing schedule for any other agency of the executive branch of the government of the State of Illinois to acquire implementation services necessary for implementing the software solution, if any. Each option will be exercised only at the State's sole discretion, and neither option will be evaluated as part of the Responsiveness Elements.

D.3. MILESTONES AND DELIVERABLES: Proposals are due **on October 22, 2014 no later than 10:00 a.m.**, U.S. Central Time. Proposals will be opened on October 22, 2014 at 10:00 a.m. Central Time at Illinois Finance Authority, 160 North LaSalle Street, Suite C-800, Chicago, IL 60601.
