

2020 ANNUAL GREEN BOND REPORT

DATED APRIL 16, 2020

RELATING TO

\$450,000,000

**ILLINOIS FINANCE AUTHORITY
STATE OF ILLINOIS CLEAN WATER INITIATIVE REVOLVING FUND REVENUE BONDS,
SERIES 2019 (GREEN BONDS)**

The above described bonds (the “Bonds”) were issued on April 16, 2019. In the Official Statement dated April 3, 2019 relating to the Bonds (the “Official Statement”) under the heading “GREEN BOND DESIGNATION – Reporting”, the Illinois Environmental Protection Agency (“IEPA”) agreed to report information on the projects financed with the proceeds of the Bonds including the name of the Participant completing the project, a description of the project, the amount of the Loan for such project, the percentage of the Loan disbursed for such project, and the expected or actual completion dates thereof. Attached is information for the first annual report through April 3, 2020 in substantially the format prescribed by Appendix G to the Official Statement.

The Official Statement provided that such report would be published annually until the Bond proceeds were completely disbursed after which no further updates would be provided. Net proceeds from the Bonds were \$532,349,350. As of April 3, 2020, \$400,382,017, or over 75%, of net bond proceeds were disbursed for Clean Water and Drinking Water loans to Illinois communities.

This report is being made solely to comply with the annual reporting specified in the Official Statement. The publication of this report does not constitute or imply any representation (i) that the information contained herein is material to investors, (ii) regarding any other financial, operating or other information about the IEPA, the Clean Water or Drinking Water programs or the Bonds or (iii) that no other circumstances or events have occurred or that no other information exists concerning IEPA, the Clean Water or Drinking Water programs or the Bonds which may have a bearing on the security for the Bonds or an investor’s decision to buy, sell or hold the Bonds. This report provides information during the annual period ended on April 3, 2020 and is not an indicator of any future performance.

Illinois SRF - Project Obligation Balances
2019 Series Only

Program	Project Number	Recipient	Project Description	Project Name	Total Obligated as of 4/3/2019	Total Disbursed as of 4/3/2019	New Assist.	Obligation Balance as of 4/3/2019	\$ Disbursed from 2019 Series	% Disbursed of 4/3/2019 Balance	Final Disbursement Made	Construction Completion Date
CWSRF	L170725	Fairbury	With receipt of this loan, the City of Fairbury proposes upgrades and improvements to Fairbury's Waste Water Treatment Plant (WWTP), collection system and lift stations. The City plans to separate limited areas of the combined sewage collection system. Upgrades at the WWTP consist of modifications to the trickling filter and activated sludge processes to maximize treatment capacity with additional improvements to the lift stations, the excess flow lagoon and the chlorine contact basin. Upgrades outside of the WWTP include installation of a South interceptor sewer; improvements to the Walcrest pump station and force main; improvements and increase in capacity to the 7th Street pump station and force main; and installation of new gravity sewer for the Timber Ridge Subdivision and Jackson Street. The City currently utilizes seven (7) CSO Outfalls. Outfalls 004, 005, 006, 011 and 013 will be eliminated. Outfalls 003 and 008 will remain for emergency relief purposes.	CSO Relief	30,431,034.25	7,633,443.38		22,797,590.87	11,586,534.95	51	No	10/21/2021
CWSRF	L171038	Lebanon	The project consists of WWTP upgrades including a new influent screening building and flow splitter, 3 sequencing batch reactor (SBR) basins with post equalization, tertiary filtration building with new cloth disk filters, new blower building, sludge dewatering building, sludge storage canopy, and other appurtenances.	STP Upgrade/Wet Weather Tre:	12,495,960.00	2,727,442.00		9,768,518.00	5,180,747.27	53	No	10/2/2020
CWSRF	L172129	Metropolitan Water Reclamation District of	At the Calumet Water Reclamation Plant (WRP), two existing Calgon P-3000 carbon odor control units will be replaced with a Bio-Trickling Filter. There will be new ductwork and covers will be installed at the valve vault chamber. At the Kyie WRP, one of the Calgon P-3000 carbon units removed from Calumet WRP will be re-installed at Airlift Station A-1. This will replace the older odor control unit at Kyrie WRP. At the Hanover WRP, the second Calgon P-3000 carbon unit removed from Calumet WRP will be re-installed at the coarse screen building to treat the exhaust. New ductwork will be installed in several buildings, new covers will be installed on the grit tanks, and the older existing system will be demolished.	Odor Control Systems @ Calum	4,216,511.00	0		4,216,511.00	758,400.00	18	No	8/28/2020
CWSRF	L172448	Beecher	The project consists of waste water treatment facility (WWTF) improvements and treatment capacity expansion, which includes: raw influent pumping station modifications; screening system improvements; conversion of the existing sludge storage in outer ring of the oxidation ditch to aeration; construct new secondary clarifiers flow division box; repair existing secondary clarifiers; construct a new secondary clarifier; chemical feed for phosphorus removal; construct a UV disinfection structure; repair excess flow structure; replace and/or repair sludge pumps; replace/repair aerobic digester equipment; provide new mechanical sludge dewatering equipment and storage area; control building improvements and provide supervisory control and data acquisition (SCADA) system improvements; provide a new emergency electric generator that will run the entire treatment plant; replace metering equipment; provide miscellaneous piping, valves, air and water lines, demolish existing truck fill station; and construction site restoration.	STP Expansion	10,000,000.00	3,357,608.39		6,642,391.61	5,480,225.11	83	No	5/31/2020
CWSRF	L172586	Highland	The project consists of modifications to the existing wastewater treatment facility that includes an influent pump station with 4 pumps each rated at 1,400 gallons per minute (gpm) and 3 rehabilitated excess flow pumps each rated at 2,100 gpm, new mechanical screen, grit chamber, phosphorus checmical treatment system, 4 oxidation ditch aerators, 3 rehabilitated RAS pumps each rated at 556 gpm, 2 new WAS pumps each rated at 345 gpm, 2 rehabilitated secondary clarifiers, 2 new 70 ft diameter aerobic digesters with 3 new blowers, along with all the necessary appurtenances to make the project complete and operational.	STP Expansion and Trunk Sewe	0	0	*	11,000,000.00	4,025,706.75	37	No	2/9/2021

CWSRF	L172685	Hopedale	This project includes a WWTP upgrade to a design average flow of 0.22 million gallons per day (MGD) with a design maximum flow of 0.49 MGD. Improvements consist of a new automatic bar screen, a package plant oxidation system with rotary aerator assemblies, one 25-foot diameter clarifier, new 400 cfm blower, 4 sludge drying beds, piping, valves, effluent pumps, return and waste activated sludge pumps, new standby generator and other appurtenances.	STP Upgrade	2,512,400.00	2,368,623.42		143,776.58	143,776.58	100	Yes	7/28/2019
CWSRF	L173033	Sycamore	The City will expand the North treatment plant to a DAF of 4.9 MGD and a DMF of 12.42 MGD. The facility will be upgraded with the addition of a new grit removal facility, microscreens, four new sequencing batch reactor (SBR) basins, a new UV disinfection system to replace the existing chlorination/dechlorination process, and the installation of new chemical feed equipment for phosphorus removal.	North STP Expansion	20,853,989.00	0		20,853,989.00	6,520,467.98	31	No	12/26/2020
CWSRF	L173062	Metropolitan Water Reclamation District of	The project consists of the rehabilitation of 5,100 l.f. of 10 to 27-inch diameter sewer, 27,699 l.f. of elliptical sewer, 72 standard manholes, 4 drop manholes, 5 drop connections, two junction chambers, and all the necessary appurtenances.	Salt Creek Interceptor Rehabilitate	45,056,403.43	42,272,800.00		2,783,603.43	502,300.00	18	No	11/12/2018
CWSRF	L173152	Batavia	The proposed project entails the separation of the combined sewer system in Area 3. Approximately 5,190 feet of storm sewer pipe and 69 storm sewer structures will be constructed to convey the runoff from Area 3. The Area's existing pipe will then be utilized to convey sanitary waste only.	CSO Separation	0	0	*	790,665.73	578,119.82	73	No	6/1/2020
CWSRF	L173974	Fox Lake	The Village of Fox Lake owns and operates two separate drinking water and wastewater systems. The Village has developed a design to connect the systems and create one wastewater system and one drinking water system. The drinking water interconnect will allow the surplus supply in the South to support the North. Interconnection of the two sewer systems will create a centralized wastewater collection and treatment system at the existing Northwest Regional Water Reclamation Facility and allow retirement of the Tall Oaks Wastewater Treatment Plant (WWTP), which has reached the end of its serviceable life. The project will have two phases and each phase will have both a drinking and wastewater component.	Phase I - New Sewers & Lift Sta	0	0	*	5,096,042.95	1,220,616.57	24	No	7/29/2020
			The Water Pollution Control Loan Program (WPCLP) portion of Phase 1, L173974, will include construction of roughly 200 Linear Feet (LF) of 24" gravity sewer, 730 LF of 8" gravity sewer, 2,460 LF of 16" force main and 3,100 LF of 12" force main. The sanitary sewer and force main will be constructed using jack and bore methods, horizontal directional drilling and traditional trenching. The WPCLP portion will also include construction of a new Bridge Lift Station and upgrades to the existing Main Lift Station. The new Bridge Lift Station will be constructed on the north end of the channel crossing and will receive all wastewater from the North System. This work is covered by IEPA Permit Numbers 2018 HB 63582, 2018 HB 63881, 2018 HB 63886, 2018 IA 63636 and 2019 IB 63543.									
CWSRF	L174243	Assumption	The Public Water Supply Loan Program (PWSLP) portion of Phase 1, L175581, will include construction of roughly 6,570 LF of water main ranging in size from 6" to 20". hydrants and valves from Grand Avenue in This project consists of the Samuel Street trunk sewer separation which includes: laying 2,242 feet of 6-inch force main, 12,698 feet of 8-inch sanitary sewer and 6,347 feet of 12-inch sanitary sewer. This project also includes construction of a 330 gallons per minute capacity lift station with 2 pumps; replacing 66 manholes and site restoration. CWSRF	L174245	Batavia	The Phase 1 project consists of the installation of chemical phosphorous removal and excess flow chlorination facilities; rehabilitation of the existing anaerobic digesters including installation of 2 digested sludge tanks with a total volume of 137,662 gals along with two 150 gpm centrifuges; construction of an intermediate pump station with 4 pumps each rated at 4,769 gpm; construction of a laboratory building; and miscellaneous associated piping and electrical equipment along with all necessary ancillary appurtenances not mentioned herein but detailed in the basis of design, plans and specifications to make the facilities complete and operational. The rated capacity of the treatment plant will not change as a result of these improvements.	Major WWTP Upgrades and Re	30,000,000.00	26,146,435.24		3,853,564.76	1,802,445.46	47	No	12/29/2018
CWSRF	L174335	Crestwood	The project consists of the lining of approximately 5,300 lineal feet of 8 to 10-inch diameter sanitary sewer, 400 sewer laterals, and miscellaneous collection system repairs for the Playfield Subdivision Phase 1 Sanitary Sewer Rehabilitation project.	Sewer Rehabilitation Playfield S	0	0	*	1,452,737.41	1,117,070.02	77	No	4/5/2020
CWSRF	L174369	Oregon	Proceeds from this loan will be utilized for the City-wide sewer rehabilitation program, which will consist of cured in place lining and spot repairs for approximately 21,697 lineal feet of sanitary sewer. In addition, approximately 30 manholes will be lined, and 10 manholes replaced. No construction permit is required for this work.	Sanitary Sewer Improvements (I	0	0	*	1,949,990.46	1,069,043.47	55	No	7/13/2020
CWSRF	L174450	Elmhurst	The project consists of improvements to the City of Elmhurst's Water Reclamation Facility (WRF) and collection system lift stations. This loan covers what is considered to be Phase I of the project, and entails the following activities: construction of a lift station having 2 pumps with a rated capacity of 1,250 gpm; rehabilitation and replacement of the existing grit collectors, grit washers, influent sampler and miscellaneous associated piping and electrical equipment along with all necessary ancillary appurtenances; modification to the existing effluent sampling station including the installation of sampler tubing, carrier pipes and miscellaneous associated piping and electrical equipment along with all necessary ancillary appurtenances; modification to the existing sludge storage pad including construction of drainage structures, a sediment/oil separation chamber, and replacing and rerouting of the existing sanitary sewer to return the supernatant back to the treatment plant; roof and masonry replacement at the WRF.	WWTP Capital Improvements	9,054,155.23	5,345,019.39		3,709,135.84	3,535,567.63	95	Yes	11/5/2019
CWSRF	L174492	North Shore Water Reclamation District	The project consists of the rehabilitation of digesters 1 and 4 at the Clavey Road Water Reclamation Facility. Additionally, the District will replace relief valves, covers, manways, and hatches in order to prevent odor leaks and help decrease required maintenance on the digesters.	Rehabilitation of Digesters 1 anc	0	0	*	1,197,739.62	309,839.40	26	No	6/21/2020
CWSRF	L174500	North Shore Water Reclamation District	This project includes the rehabilitation of approximately 80 feet of 36-inch forcemain. The existing segments of forcemain were inspected and shown to have joint mortar deterioration, broken wire wraps, and leaking issues. This project will help to ensure the integrity and extend the useful life of the collection system.	Forcemain (f-4) Repair	0	0	*	1,668,600.00	495,000.00	30	No	1/26/2020
CWSRF	L174501	North Shore Water Reclamation District	The project is for the rehabilitation of approximately 1,962 feet of sanitary sewers, ranging in size from 8-inches to 54-inches, along with multiple manholes. The rehabilitation will consist of spot lining, chemical grout repair to joints, and full lining where needed.	Sewer and Manhole Repairs	0	0	*	2,564,270.41	502,964.10	20	No	4/3/2020
CWSRF	L174610	Libertyville	With receipt of this loan, the Village of Libertyville will add equipment to the existing waste water treatment plant (WWTP) facilities that will enable chemical removal of phosphorus from the wastewater. Work will include the construction of a new chemical feed building with a chemical unloading/receiving station; chemical metering pumps and piping; indoor bulk chemical storage tanks with secondary containment and associated electrical instrumentation, including controls. CWSRF	L175425	Kishwaukee Water Reclamation District	The project consists of Phase IB Improvements to the District's wastewater treatment plant. Project specifics include modifying existing piping to pump to the new biological processes and flow in excess of the DMF to excess flow facilities; providing new circular primary clarifiers and new primary sludge pumping facilities for the full DMF; providing a new activated sludge process to meet anticipated ammonia limits and a 1.0 mg/L phosphorus limit; new circular final clarifiers for the full DMF; a new RAS/WAS pump station with RAS at 100% of the DAF; convert three existing primary settling tanks to excess flow clarifiers; a new building to house aeration system turbo blowers and primary/fermenter sludge pumps; new, separate treatment of WAS thickening filtrate and dewatering centrate (sidestream treatment) to reduce ammonia load to the activated sludge process; new primary sludge fermentation facilities to produce VFSS for the biological phosphorus removal process; selective upgrading of the existing Supervisory, Control, and Data Acquisition (SCADA) system for monitoring and control of the new facilities; extend the existing non-potable water (NPW) system to the new complete treatment system with new pumps, piping, valves, and hydro-pneumatic tank within an existing building; a new building to house electrical switchgear, automatic transfer switch, and dual fuel (natural gas and biogas) generator; a new building to house the laboratory, locker rooms, conference/break room, mechanical room, network room, GIS/printer room, administrative offices, reception area and board room. Implementation of the project also calls for the rental of two buildings and a lot to temporarily house the existing administrative operations and construction equipment.	WWTP Upgrades Phase 1B, Bic	53,055,766.00	35,870,988.97		17,184,777.03	11,035,192.65	64	No	4/8/2021
CWSRF	L175436	Dallas City	The proposed project consists of the replacement of 520 lineal feet of existing 8-inch vitrified clay pipe (VCP) sanitary sewer with 8-inch PVC sanitary sewer, replacing 10 existing manholes with new precast concrete manholes, 15,500 lineal feet of cured-in-place lining of 8-inch to 15-inch sanitary sewers, 49 point repairs at collapsed sewer main areas, the rehabilitation of 39 manholes, and 237 grouted lateral-to-sewer main connections. CWSRF	L175516	Rochelle	The City is proposing to upgrade aging and deteriorating equipment, while at the same time improving the operation of the water reclamation plant in order to meet effluent water quality standards. This project will convert the existing single stage nitrification activated sludge process to biological nutrient removal (BNR). A key component of the conversion is the existing anaerobic pretreatment lagoon: which will be cleaned-out and restored. Restoration of the lagoon includes a new liner; new cover; new biogas collection system; and biogas flare system restoration. The System 1 Lift Station, is being converted to a submersible pump station to ensure smooth operation of the anaerobic lagoon. The mechanically cleaned screen and grit washer are being replaced to improve the removal of screenings and grit to protect the new BNR system. A new administration building, which will include a new Control Room, is also part of this project. The building will house all staff and vehicles. The city will repurpose two 180' diameter trickling filter slabs to store and dry sludge, which will then be land applied. A new SCADA system will provide operational control and monitoring of the water reclamation plant treatment processes and the sanitary sewer system lift stations. Fiber optic line installation will allow system communication and control at remote buildings on the plant grounds. The Cleveland #2 lift station will be eliminated and replaced with a 15" diameter gravity sanitary sewer that will be tributary to the Jack Dame Drive lift station.	Water Reclamation & Sewer Sys	0	0	*	7,000,000.00	1,393,564.39	20	No	9/3/2020
CWSRF	L175517	Metropolitan Water Reclamation District of	This project includes excavation to create a 600 acre-foot flood control reservoir and the installation of all the necessary appurtenances such as control structure, inlet structure, spillway piping and a pumping station. DWSRF	L173767	Chicago	-Replacement of the obsolete electrical switchgear and distribution equipment with current technology equipment at the South Water Purification Plant. -Installation of five new diesel generators and associated control and distribution equipment to provide power to the SWPP in the event of a utility power failure. -Construction of a new building to house the installation of the new diesel generator equipment. -Minor architectural, electrical, and HVAC revisions to the existing facilities in order to comply with current building codes.	SWPP Switchgear Replacement	49,806,544.00	43,451,449.72		6,355,094.28	155,068.76	2	No	4/16/2019
DWSRF	L173852	Shannon	Drill and complete Well #5, construction of a Wellhouse for Well #4 and Well #5, construct 4,539 linear feet of 8-inch diameter water main and 345 linear feet of 6-inch diameter water main, construct 3 vertical pressure filters along with a fluoride, chlorine, phosphate feed system, and HMO filtration system to reduce radium levels, construct sewer connection of approximately 355 linear feet of 8-inch diameter PVC piping for backwash from the water treatment plant to the Village of Shannon Sewer Treatment Plant.	Radium Removal	4,032,392.17	3,256,498.13		775,894.04	708,409.67	91	No	7/1/2020
DWSRF	L173911	Cambridge	Construction of a new building and three pressure filters along with a gas chlorine, blended phosphate, and HMO feed system to reduce radium levels within the Cambridge Public Water Supply System. Addition of a new standby generator and controls for the new Tonka HMO Filtration system.	Radium Reduction	1,730,750.00	1,027,164.80		703,585.20	667,943.41	95	No	8/31/2019
DWSRF	L174084	Dakota	The Village of Dakota will construct a new standpipe water tower, providing 256,800-gallons of storage; construct a small building to house the chlorine feed system and mixing pumps; demolish the current water tower; and replace approximately 500 lineal feet of existing 3-inch water main with 8-inch water main.	New Water Tower	0	0	*	1,020,000.00	768,454.81	75	No	3/1/2020
DWSRF	L174092	Murdale Water District	The project entails the removal and replacement of approximately 1,450 lineal feet of watermain under a floodplain; the installation of two SCADA control systems; hydrant replacements; the addition of a generator at the Hickory Ridge Pump Station; and the installation of 3,000 lineal feet of watermain on Maple Springs Road to serve new customers.	Distribution System Improvemer	0	0	*	803,535.99	135,179.43	17	No	9/7/2020
DWSRF	L174095	Rock City	The project entails upgrades/improvements to the Village's drinking water system, including the replacement of Well #1's pump; sandblasting and painting the exterior of the 32,000-gallon hydropneumatic storage tank; Well #1 building repairs and modifications; replacement of the water system controls; the installation of a standby generator with automatic transfer switch, the installation of 18 new gate valves in the water distribution system; and the installation of 10 fire hydrants.	Water System Improvements	0	0	*	523,300.43	179,974.13	34	No	7/30/2020
DWSRF	L174168	Rockford	The City of Rockford intends to replace Lead Service Lines throughout the community. They will replace approximately 480 lead service lines within the community. This project may help to alleviate some lead exposure in the community. This is phase1 of a multi-phased project.	Replace Pb Service Lines, Iron I	0	0	*	2,000,000.00	579,011.15	29	No	6/1/2020
DWSRF	L174407	Crestwood	The activities associated with this loan consist of the installation of approximately 9,140 lineal feet of 6-inch diameter water main, 7,378 lineal feet of 8-inch diameter water main, and 892 lineal feet of 10-inch diameter water main. Additionally, approximately 41 fire hydrants will be replaced. This work is the first of three phases of the Village's water main replacement project	Water Main Improvements Phas	0	0		0	2,944,254.24	0	No	6/25/2020

DWSRF	L175428	Joliet	This loan is part of a five year water distribution system rehabilitation program. The first loan was L175427. The program will rehabilitate approximately 1% of the system each year. Loan numbers for subsequent years are as follows: L175428-2018, L175429-2019, L175430-2020 and L175431-2021. This loan will fund the City of Joliet's 2018 Water Main Improvements project. This project will increase water main capacity, decrease water main breaks, and improve fire flows. The Jefferson Street/Essington Road project includes the rehabilitation of approximately 2,800 lineal feet of water main with cured-in-place pipe liner (CIPP) and the replacement of 260 lineal feet of water main. In the Marycrest neighborhood, approximately 10,100 lineal feet of 6-inch water main will be replaced with 8- to 10-inch water main. In addition, 191 water services will be replaced and 30 new fire hydrants will be installed. In the Raynor Park neighborhood, approximately 6,300 lineal feet of 6-inch water main will be replaced with 8- to 10-inch water main. 117 water services will be replaced and 18 fire hydrants will be installed. The Schriber Avenue project includes the replacement of approximately 1,600 lineal feet of 4- and 6-inch water main with 6- and 8-inch water main. In addition, 38 water services will be replaced and 6 fire hydrants will be installed.	5 YR Water Main Rehabilitation	5,830,195.90	5,082,112.08		748,083.82	16,249.09	2	Yes	12/15/2018
DWSRF	L175429	Joliet	This loan will fund the third year of a five-year water distribution system rehabilitation program. The program will rehabilitate approximately 1% of the system each year. The loan for the first year, 2017 was L175427. The loan for the second year, 2018 was L175428. L175430 is scheduled for May 2020 and L175431 is scheduled for May 2021. Project inventory includes the installation of approximately 492 feet of 6-inch water main; 19,965 feet of 8-inch water main and 6,744 feet of 12-inch water main.	5 YR Water Main Rehabilitation	7,730,333.76	0		7,730,333.76	4,962,955.35	64	No	12/15/2019

DWSRF	L175480	Chicago	As part of Chicago's ongoing water main upgrade project, the loan eligible aspect of this project consists of the replacement of 55 miles of water main.	Watermain Replacements Caler	105,321,333.00	64,570,973.89		40,750,359.11	33,033,074.63	81	Yes	7/21/2019
DWSRF	L175481	Chicago	This Loan combines the ongoing activities associated with previous loans L175331, which consisted of Districts 3 through 6, and L175417, which consisted of Districts 1 and 2. Loan funds will be utilized to install water meters at residences throughout the City that are currently unmetered. Installations will be performed by a private contractor. Meters will be equipped with AMR (Automatic Meter Reading) capabilities. Funds will also be used to replace outdated, existing meters with AMR capable units. Loan funds will only pay for installation costs, not water meters. Costs associated with the original construction contract have already been covered by previous loans, however the contract allowed for a one year extension. This loan covers costs which are associated with the extension of the original contract.	MeterSave (CY2018 contract ex	18,000,000.00	8,714,768.82		9,285,231.18	2,574,098.94	28	No	10/9/2019
DWSRF	L175485	Olmsted	The proposed project consists of improvements and increasing the capacity of the water treatment plant (WTP) by 50 percent, and construction of approximately 4,800' of water main. This will include: the removal and replacement of well pumps, aerators, high service pumps, clearwell, and controls; construction of a chemical feed room addition with necessary piping, valves, fittings, and electrical; install an emergency electrical generator; and construction of 4,800 linear feet of 4-inch diameter PVC water main, one pressure connection, one flush hydrant, and two meters and water service lines. DWSRF	L175547	Savanna	The city of Savanna will use the proceeds from both Water Pollution Control Loan Program (WPCLP) and Public Water Supply Loan Program (PWSLP) loans for an economic development project that will reconstruct Wacker Road and designate it as a marked truck route from IL-84 to the Easterly City limits. These changes include widening the roadway; sidewalk and larger diameter storm sewer installation. The roadway will be significantly lowered to meet design criteria for drainage. The roadway reconstruction will impact all the utilities in the right-of-way. The WPCLP portion of the project, L175546 (\$559,910.84), will include reconstruction of roughly 1,420 linear feet (LF) of 12" sanitary gravity sewer; extend the gravity sewer from Iris Street to Maple Lane; connect roughly 60 LF of 8" force main to the new gravity sewer at Maple Lane; abandon the force main from Maple Lane to Highway 84 and 6 new concrete manholes. The PWSLP portion of the project, L175547 (\$987,148.54), will include relocation and reconstruction of roughly 1,900 LF of 12" water main; 2,000 LF of 8" water main; new fire hydrants and new water services from the public right of way to the property lines	Wacker Drive Watermain Repla	0	0	*	987,148.60	564,147.39	57	No	5/29/2020
DWSRF	L175551	Central Lake County Joint Action Water Ag	Construction of three master meter stations for the Villages of Wauconda, Volo, and Round Lake. Each station will consist of a meter, valves, controls and all related appurtenances. This project will also include the installation of approximately 400 linear feet of 16-inch diameter water main to connect Central Lake County Joint Action Water Agency with the Villages of Volo and Wauconda. The master meter station for the Village of Round Lake is being constructed as a redundant meter station. DWSRF	L175581	Fox Lake	The Village of Fox Lake owns and operates two separate drinking water and wastewater systems. The Village has developed a design to connect the systems and create one wastewater system and one drinking water system. The drinking water interconnect will allow the surplus supply in the South to support the North. Interconnection of the two sewer systems will create a centralized wastewater collection and treatment system at the existing Northwest Regional Water Reclamation Facility and allow retirement of the Tall Oaks Wastewater Treatment Plant (WWTP), which has reached the end of its serviceable life. The project will have two phases and each phase will have both a drinking and wastewater component.	Phase 1 - Transmission Main to	0	0	*	3,903,957.05	783,452.42	20	No	7/29/2020
			The Public Water Supply Loan Program (PWSLP) portion of Phase 1, L175581, will include construction of roughly 6,570 LF of water main ranging in size from 6" to 20", hydrants and valves from Grand Avenue in the South System to the proposed Bridge Lift Station and connect to the North System. The water main will be constructed using jack and bore methods, horizontal directional drilling and traditional trenching. This work is covered by IEPA Permit Number 0105-FY2019.									
			The Water Pollution Control Loan Program (WPCLP) portion of Phase 1, L173974, will include construction of roughly 200 Linear Feet (LF) of 24" gravity sewer, 730 LF of 8" gravity sewer, 2,460 LF of 16" force main and 3,100 LF of 12" force main. The sanitary sewer and force main will be constructed using jack and bore methods, horizontal directional drilling and traditional trenching. The WPCLP portion will also include construction of a new Bridge Lift Station and upgrades to the existing Main Lift Station.									
DWSRF	L175587	T-L Rural Water District	The T-L Rural Water District will construct a 50,000-gallon elevated steel water storage tank at the Trivoli site; upgrade the Pleasant Grove pump station with two 130 gallons per minute (gpm) pumps and install a SCADA communications system. These improvements will replace the Trivoli 50,000-gallon ground storage tank, 100 gpm pump station and 5,500-gallon hydro-pneumatic tank. The Water District will also replace approximately 12,216 linear feet of 6" water main along Pleasant Grove Road.	Trivoli Improvements	0	0	*	1,304,313.65	639,639.03	49	No	6/17/2020
