RE:

Message from the Executive Director

Dear Members of the Authority:

End of the First Quarter of Calendar Year 2011//Third Quarter Fiscal Year 2011: An Assessment of Market and Regulatory Challenges

When we rushed to complete a number of financings prior to the expiration of federal stimulus programs in December 2010, we believed the tax-exempt municipal market was about to sag. These predictions proved accurate. Nationally, new issue tax-exempt municipal volume was the lowest in a decade during the first quarter of calendar year 2011. *No Relief Likely for Muni Bonds*, WSJ, Jeannette Neumann and Serena Ng, April 4, 2011.

In January 2011, we discussed the potential negative consequences resulting from the report of the bipartisan commission of the deficit, the *National Commission on Fiscal Responsibility and Reform: The Moment of Truth* ("Deficit Report") in connection with the established national policy of federally tax-exempt municipal debt financing. The Deficit Report, among other recommendations, urged an end to the tax-exempt status of municipal (both general obligation and conduit) bonds as part of an overall strategy of national tax reform.

Over the past week, legislative proposals were introduced in both Houses of Congress that challenge the longstanding national policy of tax-exempt municipal debt. More specifically, House Republicans introduced a budget blueprint for the upcoming fiscal year that generally supported the Deficit Report position against tax-exempt municipal debt. Similarly, Senators Wyden (D-Oregon) and Coats (R-Indiana) introduced legislation in the Senate to replace the tax-exemption with tax-credits after fiscal year 2011. Other legislation with bi-partisan support has been introduced or proposed. In addition to these legislative proposals the Congressional Research Service released a report that criticized tax-exempt municipal debt as "economically inefficient." State and Local Government Debt: An Analysis, Steven Maguire, March 31, 2011, p. 16; see also, Dow Jones Newswires, Andrew Ackerman, April 5, 2011.

Also, the U.S. Securities and Exchange Commission's proposed rule to regulate as "municipal advisors" volunteer board members of issuers like the Illinois Finance Authority (the "IFA") remains pending.

IFA staff will continue to monitor these developments through our own resources and through national organizations such as the Council of Development Finance Agencies ("CDFA"), the National Association of Health and Educational Facilities Finance Authorities ("NAHEFFA") and the National Association of Bond Lawyers ("NABL").

Despite the market and regulatory challenges outlined above, the experience of the IFA is that taxexempt municipal finance is both a long-established and highly effective system of delivering federal benefits to not-for-profit, corporate and individual borrowers. Importantly, the current tax-exempt conduit system effectively leverages discreet federal benefits for private investment through a system that places a high priority on accountability and transparency as decided by states, counties and municipalities. The result in Illinois has been job retention as well as job creation through targeted capital investments in healthcare, higher education, manufacturing, agriculture, water supply infrastructure and other areas. As it currently exists, federally tax-exempt conduit finance harnesses private sector investment to national public policy priorities as articulated in the federal tax code. The IFA is proud to be part of this construct of federalism that has proved to be a powerful, well-established and well-understood driver for economic development and capital investment.

End of the First Quarter of Calendar Year 2011//Third Quarter Fiscal Year 2011: The State of the IFA

IFA revenues are currently running well ahead of budget. As noted in previous reports and highlighted in the attached finance and pie-chart documents, IFA had a particularly strong finish to calendar year 2010 due to the expiring federal stimulus tools and in spite of economic challenges. Over the past quarter, the IFA closed over \$402 million through ten individual tax-exempt conduit transactions:

DePaul University	\$1	64.4 million
CHF-Normal, LLC-Illinois State University (dormitory)	\$ 5	59.6 million
CHF-DeKalb, LLC-Northern Illinois University (dormitory)	\$1	32.2 million
Sarah Bush Lincoln Health Center	\$	45.0 million
Beginning Farmer Bonds (six projects)	\$.7 million

In connection with IFA's recent appropriation hearings before State House and Senate Committees, we had the opportunity to see the benefits of efforts by the IFA Board and staff to recalibrate our organization's cost structure. Between Fiscal Year 2008 and Fiscal Year 2011 (ending March 31, 2011), IFA reduced operating expenses by 43.3%. During that same time period, headcount was reduced from 31 to 19, a 39% reduction and annualized payroll costs were reduced by 37%. In short, the IFA has made the difficult, but critical choices, necessary to operate in the currently perilous market and regulatory environment.

Illinois Senate: Appropriation Hearing

On April 7, the IFA appeared before Senate Appropriations I Committee. We thank Chairwoman Heather Steans, Vice-Chairman Dan Kotowski and Minority Spokesman Matt Murphy and the rest of the committee for the opportunity to describe IFA's State economic development mission and accomplishments. We appreciate their supportive feedback and suggestions.

Change on the Board

Our colleague, Joe McInerney, has decided to leave the IFA board. We thank Joe for his service and wish him luck in his future endeavors.

Conclusion

As always, I look forward to continuing to work with you to fulfill our public economic development mission.

Respectfully,

Christopher B. Meister
